Education

University of Toronto

HBSc, Computer Science & Mathematics, Minor in Statistics | CS GPA: 3.85 / 4.00

Toronto, ON

2025 – 2029

- Coursework: Advanced Math - Real Analysis & Abstract Linear Algebra, Intro to Computer Science, Statistics & Data Science, Reasoning for Computer Science, Microeconomics, Linguistics, Management

Experience

KPMG

AI Security & Automation Intern

Toronto, ON

May 2026 – Present

- Working in Digital Security Group's policy and platform security teams
- Assisting in documenting compliance information for regulatory audits
- Writing AI agents to automate workflows (incl. client query responses) while complying with security regulations
- Refining databases to optimize Retrieval-Augmented Generation (RAG) process

General Robotics

Software Engineer Intern – AI Model Research

Kirkland, WA

Sep 2024 – Dec 2024

- Expanded robotic perception stack with 3 ML models for action recognition and visual odometry
- Improved visual odometry performance by 15% using Princeton DPVO pipeline integration
- Built classification/data quality systems for robotic sensor datasets and model selection workflows

University of Waterloo

Research Assistant & Software Intern

Waterloo, ON

Jan 2024 – Apr 2024

- Only high school intern accepted into software security research lab (FuzzSlice) under Dr. Nagappan
- Added C++ repository support to FuzzSlice, increasing dataset coverage by 30%
- Built Flask + React demo platform showcased at ICSE 2024 to 2,000+ attendees

Selected Projects

Clonio AI

2024 – Present

📱 App Store

Python • Flask • SwiftUI • LLMs • Gemini • NLP • Data Pipelines

- Deployed AI personality cloning platform with Python Flask backend, iOS + web clients, and custom inference pipelines
- Scaled to 1M+ processed messages, featured in 10+ media outlets, received \$3,500 Ontario government grant for development
- Reached Top 25 Productivity ranking on the App Store in the United States, Canada, and Switzerland

Math Contest Repository

2023 – Present

🌐 Live Platform

Python • Flask • Full Stack • Data Modeling

- Built large-scale online math contest platform with 500+ users, 6,000+ solution submissions, and 1,400+ problems
- Designed leaderboard systems, automated problem type tagging pipelines, and personalized problem recommendations
- Scaled platform to 10K+ monthly impressions and partnered with Desmos for premium online calculator integration

Volcano Judge

2022 – 2023

🔗 GitHub

C++ • Python • Sandboxing • Distributed Evaluation

- Developed competitive programming online judge for automated code evaluation, supports Python 3 and C++ 20
- Implemented isolated Python sandboxing system and REST APIs for scalable grading workflows

Independent Research

2024 – Present

- Researching odd perfect numbers and independently derived Euler structural characterization
- Collaborated with Carnegie Mellon professor on heuristic algorithms for efficient addition-subtraction chain generation

Technical Skills

Languages: Python, C, C++, Java, SQL, Swift, JavaScript, R, HTML/CSS, $\text{\LaTeX}$

Machine Learning: PyTorch, TensorFlow, scikit-learn, NLP, LLMs (incl. APIs), Statistical Modeling, Reinforcement Learning

Systems/SWE: Algorithms & Data Structures, Linux, Git, Docker, Flask, Django, React, ServiceNow, Distributed Systems

Achievements

Top 5%, Canadian Computing Competition Senior (2024-2025)

\$200 Replit Prize Winner, Hack the North 2023

3x First Place, PEO Programming Competition (2021-2023)

Gold & Silver Medalist, Halton Skills Coding (2023, 2025)
