Education

University of Toronto

Bachelor of Computer Science | Double Major in Computer Science & Mathematics

Toronto, ON

2025 – 2029

- Data Structures & Algorithms, Systems Programming, Computer Organization, Software Design, Theory of Computation

Experience

KPMG

AI Engineering Intern

Toronto, ON

May 2026 – Aug 2026

- Developed **LLM-powered agents** to automate client query and vendor audit workflows, reducing execution time by **80%**
- Created **agentic processes** and internal dashboard to monitor adherence to KPMG Global Standards
- Implemented **Python + React dashboard** for KPMG Canada's **ISO 42001 certification**, the first among the Big Four

General Robotics

Software Engineer Intern

Kirkland, WA

Sep 2024 – Dec 2024

- Expanded a robotic perception system by integrating **3 ML models** for action recognition and visual odometry
- Improved visual odometry performance by **15%** on autonomous drone platform by changing model

University of Waterloo

Research Assistant & Software Intern

Waterloo, ON

Jan 2024 – Apr 2024

- Added C++ repository support to FuzzSlice, increasing test repository coverage by **30%**
- Built a Flask demo platform presented at ICSE 2024 to **2,000+ attendees**

Selected Projects

AI Content Creation Agent

2026 – Present

📺 YouTube

Python • Flask • Google Cloud (GCP) • AWS • LLMs

- Built an **AI agent** for topic research, script generation, visual assets, narration, video assembly, and YouTube publishing
- Implemented automated monitoring of views and engagement to automatically optimize **titles, thumbnails, and content**
- Generated **800K+ YouTube views** in two months.

Clonio AI

2024 – Present

📱 App Store

Python • Flask • SwiftUI • LLMs • Gemini • Data Pipelines

- Built an AI personality-cloning platform with a Python Flask backend, iOS and web clients, and custom inference pipelines
- Reached **Top 25** in the Productivity category on the App Store in the United States, Canada, and Switzerland
- Drove product traction through 10+ media features and a **\$3,500 Ontario government grant**, reached **1M+** processed messages

Math Contest Repository

2023 – Present

🌐 Live Platform

Python • Flask • Full Stack • Data Modeling

- Built a large-scale online math contest platform with **500+ users**, **6,000+ solution submissions**, and **1,400+ problems**
- Designed leaderboard systems, automated problem-tagging pipelines, and personalized problem recommendations
- Scaled to **10K+ monthly impressions** and partnered with Desmos for free API and premium calculator integration

Volcano Judge

2023

🔗 GitHub

C++ • Python • Sandboxing • Distributed Evaluation

- Developed an online judge for automated code evaluation supporting **Python 3 and C++ 20**
- Implemented isolated Python **sandboxing** and REST APIs for scalable grading workflows

Activities

UofT Algorithmic Trading Association (UTATA)

Co-Founder, President

Toronto, ON

May 2026 – Present

Technical Skills

Languages: Python, C++, C, Java, SQL, R, Swift, HTML, CSS, JavaScript

Frameworks / Tools: Flask, Django, SwiftUI, PyTorch, scikit-learn, Docker, Git, Linux

Cloud / Infrastructure: AWS, Azure, Google Cloud (GCP)

Achievements

Top 5%, Canadian Computing Competition Senior (2024-2025)

\$200 Replit Prize Winner, Hack the North 2023

3x First Place, PEO Programming Competition (2021-2023)

Gold & Silver Medalist, Halton Skills Coding (2023, 2025)
